

Dear Health Care Provider,

Your patient recently participated in the Cognivue Thrive™ assessment screening. We initiated this screening to help promote optimal cognitive health.

Cognivue Thrive™ is the only computerized cognitive assessment program based on the same FDA-cleared technology used by neurologists and other physicians for evaluating cognition. It is not a diagnostic tool. We respect your relationship with your patient and encouraged them to discuss their report results with you to promote a productive conversation about cognitive health.

For further information on Cognivue's technology platform and clinical validation, please go to www.cognivue.com. Please email clinical questions to medicalinformation@cognivue.com.

Thank you,
