

**Dear Health Care Provider,**

Your patient participated in the Cognivue Thrive™ screening. They initiated this screening to help promote optimal cognitive health.

Cognivue Thrive™ is the only computerized cognitive assessment program based on the same FDA-cleared technology used by neurologists and other physicians for evaluating cognition. It is not a diagnostic tool. Your patient was encouraged to discuss the report results with you to promote a productive conversation about cognitive health.

If you have clinical questions, please email them to [medicalinformation@cognivue.com](mailto:medicalinformation@cognivue.com) and for further information on Cognivue's technology platform and Clinical Validation, please visit our website [www.cognivue.com](http://www.cognivue.com).

Thank you,
